The Ohio/Penn DX Bulletin No. 843 - excerpts
3Y, BOUVET ISLAND (Update)
Petrus, 3Y0E, continues to be active daily on 14260 kHz usually between 1600-1900z. The 3Y0E Web page reports that they have received another portion of QSOs logged by Petrus up to January 24th. It also mentions: "Important note: Due to the amount of E-mails we receive with log queries (i.e. I'm not in the log, correct my call, put me in the log please etc.), we would like to ask kindly to refer to this post regarding log issues. We also would like to repeat that none of the missing entries nor suffix corrections etc. in the log may be corrected without good proof that a QSO took place (i.e. recording of a genuine QSO) and we cannot refer to any issues like those until Petrus comes back to RSA from Bouvet Island with his notes and logbook. All queries will be revised then and all operators concerned will be contacted with exact info of their logbook entries status. Thank you for understanding."
The 3Y0E log is now available online at:
http://sq8aqd.net/3y0e/index.php
ONE MORE NOTE: The team at 3Y0E.com are very excited to report that a "World Exclusive" will soon be appearing on the Web site. This has never happened before on any DXpedition Web site. They are delighted to be the first. They hope to have this ready for you over the weekend, or Monday at the latest....
